

## Ultimate Solutions Bring A New Level of Reliability & Peace of Mind

Energy Independence. More Choice. Less Waste.

### Improving Healthcare Facilities Resilience to Power Outages

*Energy Professionals partners with industry leading solution providers to provide the ultimate solutions to energy reliability.*

## Introduction

With an increasing population of an estimated 50 million older adults, the U.S. experiences an increase in people reliant on residential, retirement and assisted living facilities. With such growth, facilities are facing challenges in improving operation efficiency, rising energy costs due to increased usage and most importantly, solving energy reliability to protect their facilities against an increasing number of power outages that sometimes last for days.

-  Rising Energy Costs
-  Multi Building Facilities
-  Energy Reliability

In 2019, the risk of power outages increased by 23 percent with over 25,000 outages affecting more than 28 million homes and business; some power outages lasting for up to two weeks.

## Our Approach

Energy Professional's employs solutions that not only address the problem, but also provide continued savings and complete peace of mind.

Be it renewable sourced back up batteries or back up generation powered by natural gas, we tailor make cost-effective installations that seamlessly integrate with the local grid; allowing facilities to continue operations as long as needed, with minimal interruption.

Taking it one step further, we introduce a patented intelligence platform, giving management the ability to generate energy savings and access real time data about operations from any smart device - ultimately responding to local utility demand response programs.

## What Our Clients Say:

*"Being able to instantly see the total energy usage in the building allowed us to throttle down energy usage when we approach energy peaks, which cut demand charges down by 30-40%"*

*"From the minute I met this company I knew they knew what they were talking about. Their dedication and care to their clients and strategic partners really shows. I would recommend them to anyone who is trying to create an energy efficient home or business over any other."*

## Our Other Solutions

- Energy Procurement
- Demand Response
- Solar Power
- Energy Efficiency
- Energy Bill Auditing
- Water Conservation
- HVAC New Life Restoration
- Microgrid Design & Implementation

## The Result

A Tailored Solution Against Black Outs and Power Outages

Enhanced Reliability, Heightened Security.

Electricity Usage Reduction

A Dashboard With Data and Analytics About Usage, Providing Control.

Energy Spend Reduction & Budget Control

## About Energy Professionals

Founded in 1999, Energy Professionals is one of North America's leading energy consultants working with commercial customers to reduce and control their energy budgets. We build client-specific, comprehensive energy strategies that factor in our clients' goals and objectives. Utilizing our extensive network of suppliers, energy efficiency experts and renewable energy partners, we bring the most effective, efficient and innovative technologies to the table. We offer both focused solutions to a specific issue and broad plans to address long-term growth, paving the way for energy independence, providing more choice and less waste.
